## Make Your Move Easier!

1. **Begin packing belongings that are not used frequently.** These items can usually be found in the basement, attic, garage, and extra closets.
2. **Reinforce the bottoms of your boxes with extra tape.**
3. **Pack on a room-by-room basis.** Label each box with its coordinating room.
4. **Wrap fragile objects** such as dishes, lamps, and pictures with towels, sheets, or curtains. This saves time and room, since you are essentially packing two items at once.
5. **Don't forget to mark boxes** that contain breakables as "Fragile."
6. **Remove dresser drawers** so that the furniture is lighter and easier to move. Save space by packing unbreakables in the drawers.
7. **Place small but heavy items in small boxes** so that they are easier to move and lift. These items may include books and canned goods.

*Dollies will make your move much easier!*
